SUMMARY

Associate Software Developer with a Master's in Computer Application and strong backend development experience using Java, Spring Boot, and MySQL. Experienced in building multi-level approval workflows and loan processing systems. Skilled in handling concurrency, transaction management, optimized code. Focused on building scalable, reliable backend systems.

EDUCATION

College of IT and Management Education 2021 – 2023
Master in Computer Application - **CGPA - 8.83** Bhubneswar, Odisha

Bhanja College of Computer and Management 2018 – 2021
Bachelor of Computer Application - **Percentage - 78%** Bhanjanagar, Odisha

TECHNICAL SKILLS

Java, Sql, SpringBoot, RDBMS, AWS, Docker, Redis, Git

EXPERIENCE

Rumango IT and Consulting Services Dec 2024 – Present
Associate Software Developer Bangalore, India

DTB Icust Service

- Developed a **multi-level account approval workflow**, enabling staged verification and controlled activation of user accounts.
- Implemented **role-based approval logic** to handle different approval hierarchies and user states efficiently.
- Handled **concurrent user requests** by ensuring thread-safe operations and maintaining data consistency during approval processes.
- Designed and optimized backend services using **Spring Boot, Hibernate, and JPA** for efficient user data processing.
- Applied **transaction management** to ensure atomic operations during account creation and approval updates.
- Improved system reliability using **exception handling, input validation, and status tracking mechanisms**.
- Worked in a **Waterfall development model**, contributing to requirement analysis, development, and testing phases.

ABC LOS – Vehicle Loan Module

- Developed backend functionalities for **vehicle loan processing system** used in bank back-office operations.
- Implemented **loan request workflow**, where Relationship Managers (RM) create loan applications that pass through multi-level approval stages.
- Built and managed **approval lifecycle logic**, handling different loan states such as pending, approved, and rejected.
- Transformed and validated OCR response data, ensuring accurate **data mapping and storage** in internal systems.
- Designed database interactions using **Spring Boot, JPA, and MySQL** for efficient handling of loan and customer records.
- Handled **concurrent loan requests** and ensured data consistency using transaction management and optimized queries.
- Worked closely with cross-functional teams in a **Waterfall model**, contributing to requirement understanding, development, and testing phases.
